

# Documentation

## Self-Purchase Bot

### 1. Download the Python

First, Install the python by going to following address.

<https://www.python.org/downloads/>

### 2. Download Google Chrome Browser

Go to <https://www.google.com/chrome/beta/> . And, install the updated Beta chrome.

### 3. Install the Requirements

Open the **Installer.bat** file to install project requirements. It may take 2 to 3 minutes.

installer.bat

#### 4. Set Payment Details

Open **main.py** file with any text editor. And, set your payment details. I have set random details for testing, replace them with your payment details (as show in the picture below).

Replace **Xaibi** with your name, **Card\_number** with your card number and so on.

```
#####  
  
# Put Your Payment Details Here.  
  
Name_of_the_card = "Xaibi"  
Card_number = "4263982640269299"  
Valid_date = "03/2023"  
card_varification_number = "333"  
ruth = "153369492714"
```

#### 5 Run Bot

Open **bot.bat** to run the bot.

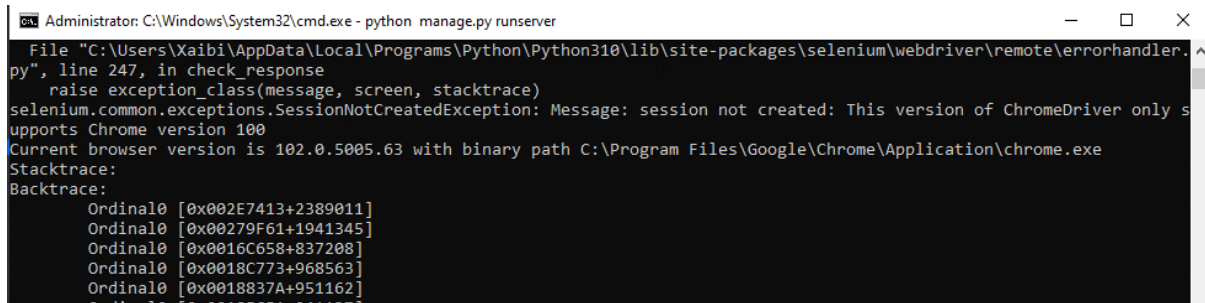

You can open multiple number of bots by double click to work with multiple accounts.

## Note:

If you are facing such an error:

**“This version of ChromeDriver only support Chrome version 1xx.”**

**OR** Update your chrome driver.

A screenshot of a Windows command prompt window titled "Administrator: C:\Windows\System32\cmd.exe - python manage.py runserver". The window shows a Python traceback for a Selenium error. The error message is: "selenium.common.exceptions.SessionNotCreatedException: Message: session not created: This version of ChromeDriver only supports Chrome version 100". Below the message, it states "Current browser version is 102.0.5005.63 with binary path C:\Program Files\Google\Chrome\Application\chrome.exe". A stack trace is also visible, listing several ordinal values in brackets.

```
Administrator: C:\Windows\System32\cmd.exe - python manage.py runserver
File "C:\Users\Xaibi\AppData\Local\Programs\Python\Python310\lib\site-packages\selenium\webdriver\remote\errorhandler.py", line 247, in check_response
    raise exception_class(message, screen, stacktrace)
selenium.common.exceptions.SessionNotCreatedException: Message: session not created: This version of ChromeDriver only supports Chrome version 100
Current browser version is 102.0.5005.63 with binary path C:\Program Files\Google\Chrome\Application\chrome.exe

To solve this error, follow the steps:

Download chrome updated driver from: <https://chromedriver.chromium.org/downloads>

(Download chrome driver according to your chrome browser version.)

After downloading, unzip the driver. Copy and replace it in project folder **“self purchase bot”**

In **“self purchase bot”** folder, “chromedriver.exe” will already exist. You have to replace it with your new downloaded driver.

Also update your chrome browser if not upto-dated.
